

TIERTEK

IT SOLUTIONS

Businesses are becoming increasingly dependent on their IT infrastructures and are requiring greater reliability, performance, and security from their environments. As electronic business continues to evolve, businesses are faced with ensuring that their network and security applications are reliable and that they have the ability to grow while maintaining business continuity and network integrity. Your company's data is a critical asset; any loss could destroy your business.

TierTek's TekReview Assessment Services identify weaknesses within your existing IT and security infrastructures and provide recommendations and remediation advice based on best practices. Our goal is to work with you to strengthen your organization and protect it from current and future threats. We want to ensure that your network supports your organization and your technology goals.

TierTek's TekReview provides the following assessment specialties:

- **General Site Assessment** - The general site assessment of your IT environment can focus on network connectivity, servers, desktops, network security, data backup, storage, and disaster-recovery policies and solutions. A summary report identifies recommendations for improvements to the existing infrastructure and provides a road map for future recommendations.
- **Project Assessment** - We perform a general assessment of your specific project, and we provide a high-level summary of the existing infrastructure and recommendations to ensure a cost-effective and successful implementation of the project.
- **Network Assessment** - We assess your network environment and provide recommendations for upgrades and improvements, technology road maps, and technology deployments that allow you to achieve your business and technology goals.
- **Server Assessment** - TierTek performs an assessment of your current server environment and provides recommendations for improving upon existing system policies, security, and data-protection solutions. The result is a road map that outlines recommendations that allow you to meet your business and technology goals.
- **Security Assessment** - We analyze the existing security infrastructure and provide recommendations for improvements to security policies and procedures, firewall infrastructure, and intrusion-detection solutions. The result is increased business security and protection against costly downtime and loss of proprietary company information.

TEKREVIEW

TIERTEK

IT SOLUTIONS

TEKREVIEW

TierTek's TekReview Features:

- Custom assessments at an affordable fixed price
