

TIERTEK

IT SOLUTIONS

TEKWIREFLES

Wireless communications present many distinct challenges, including the reality of multiple networks, multiple standard devices and protocols and the difficulty of maintaining communications within a specific coverage area. Small business owners simply need expert assistance resolving these wireless challenges and sorting out available options which meet their specific needs. A structured wireless LAN, with distributed intelligence, provides performance, security, reliability and scalability.

With an in-depth understanding of wireless technology standards, TierTek IT Solutions can assess your wireless needs then design and implement a Wireless LAN infrastructure that will enhance your business experience.

Services Include:

- Wireless Assessment
- Survey of infrastructure to determine connectivity to LAN
- Survey of Wireless coverage area
- Design of WAN to include Access Point and antenna placement
- Assistance in the selection of wireless devices
- Implementing Security standards to ensure the security of your data over the Wireless WAN
- Testing wireless WAN performance

Why TierTek IT Solutions?

Whether you have an IT department, an employee named Bob who has an interest in computers, or outside consultants, we can compliment the IT expertise that is available to you. What if you don't have access to IT expertise? We can also provide a complete outsourcing solution, covering every aspect of developing and maintaining your network. We understand small business needs and have the experience and knowledge in best practices, solutions and technology to benefit your business today and as it grows and changes in the future.

Quite simply we **"Make I.T. Simple!"**
